EXPERIENCE

Monster Notebook Technology Products, Istanbul, Turkey, *September 2021 – Present*
Software QA Engineer

Contributed to e-commerce projects as a Software QA Engineer, focusing on UI, E2E integration, and API testing. Actively involved in the development of web and mobile test automation systems for various platforms.

- Designed and implemented automation frameworks using Selenium and Appium (Testinium, Browserstack, Java).
- Created and executed comprehensive Test Plans, Test Cases, and End-to-End Scenarios based on user stories.
- Conducted manual API testing using Postman.
- Performed Regression, Integration, and E2E testing for critical projects.
- Utilized Azure as a remote repository for streamlined collaboration.
- Authored detailed documentation for software defects and issues.
- Actively participated in Agile ceremonies, including sprint planning, daily scrums, grooming, and retrospective meetings.

Doğuş Technology via Quality Museum, Istanbul, Turkey, *May 2021 - September 2021*
Software QA Engineer

Led QA efforts for a mobile application project (Zubizu) as a QA Team Lead, ensuring seamless testing processes and quality deliverables.

- Managed the test team and established testing strategies.
- Developed a comprehensive Master Plan for testing processes.
- Created reusable templates for test cases and reviewed test documentation.
- Monitored task connections and scenario updates using Azure tools.
- Supervised and reported resolved bugs within the team.
- Ensured regression scenarios were automated by the automation team.
- Supported backlog refinement processes with actionable test items.
- Conducted one-on-one meetings with QA team members for performance improvements.

Akbank via Netaş, Istanbul, Turkey, *September 2018 - May 2021*

Software QA Engineer

Specialized in mobile banking projects, performing UI and E2E integration tests to maintain functionality and usability across Akbank mobile applications.

- Executed front-end functionality tests of the mobile banking app.
- Tracked and reported bugs using TFS for efficient issue resolution.
- Created and maintained datasets to support various testing scenarios.
- Conducted User Acceptance Tests (UAT) and prepared actionable feedback.
- Performed manual and regression testing for mobile applications.
- Wrote test scenarios based on analysis documents and integrated them into TFS.
- Conducted web service testing using SOAP UI for robust backend validation.

SKILLS

Automation Tools: Selenium, Appium, Testinium, Browserstack

Programming: Java, Python, Cucumber, Gauge

API Testing: Postman, SOAP UI, Swagger/OpenAPI

CI/CD & Management: Azure, Jira, TFS

Databases: SQL

Other: Manual Testing, Test Scenarios, User Stories, Scrum

LANGUAGE

Turkish, English
