PROFESSIONAL SUMMARY

Senior Software QA Engineer with 7+ years of experience across banking, e-commerce, web, mobile and API testing. Built and modernized test automation across Java/Selenium/Gauge and TypeScript/Playwright, including an in-house Playwright framework running behind the corporate VPN. Built a Python + Playwright LLM-as-a-Judge system that evaluates 400+ production chatbot scenarios and reports results with Allure. Also built and shipped Vento, a production React Native app, to the App Store and Google Play.

CORE SKILLS

Automation: Playwright, Selenium, Appium, Gauge, Cucumber, TestNG, Pytest, Testinium, Allure

API & Mobile: Postman, REST API, SOAP UI, Swagger/OpenAPI · iOS/Android · BrowserStack

CI/CD & Tools: GitHub Actions, Git, Azure DevOps, Jira, TFS

Ways of Working: Agile/Scrum, cross-functional collaboration, release & production checks

Programming: TypeScript, Python, Java, SQL

AI-Assisted QA: LLM-as-a-Judge, OpenAI API, Gemini API, Cursor, Claude, ChatGPT

QA Practices: Test strategy, test design, E2E, regression, smoke, UAT, exploratory testing, defect management

Languages: Turkish (native), English (B1)

PROFESSIONAL EXPERIENCE

Senior Software QA Engineer — Monster Notebook | Istanbul · Sep 2021 – Present

QA ownership for an e-commerce platform covering 4 country sites and iOS/Android applications.

- Rebuilt the web test automation as a TypeScript + Playwright framework and migrated execution to an in-house server behind the corporate VPN, modernizing the previous Testinium / Java / Selenium / Gauge setup.
- Designed and built a production AI chatbot test automation system from scratch with Python + Playwright: 400+ predefined questions, actual-vs-expected evaluation through an LLM-as-a-Judge layer (OpenAI/Gemini), reasoned pass/fail verdicts, Allure HTML reporting, screenshots and Excel export.
- Previously established the company's first web test automation - first with TestProject, then with Java, Selenium and Gauge on Testinium infrastructure.
- Own test planning, test case design and end-to-end scenarios from user stories; execute REST API testing with Postman across platform services.
- Manage functional, regression and E2E testing of iOS/Android apps on real devices and BrowserStack; track defects and documentation in Azure DevOps within Agile/Scrum delivery cycles.
- Use Cursor, Claude and ChatGPT as engineering assistants during framework design, debugging and refactoring while retaining technical review and decision ownership.

Software QA Engineer (QA Team Lead) — Doğuş Technology, via Quality Museum | Istanbul · May 2021 – Sep 2021

Led a 4-person QA team for Zubizu, Doğuş Group's iOS/Android loyalty application (fixed-term project).

- Created the master test plan, standardized test case structure and organized scenario/task tracking in Azure DevOps.
- Managed regression handover to the automation team and coordinated team workload planning and one-on-one follow-ups.

Software QA Engineer — Akbank, via Netaş | Istanbul · Sep 2018 – Apr 2021

Mobile banking projects: Akbank Mobile and Axess iOS/Android applications.

- Performed UI, end-to-end integration, regression and UAT testing for mobile banking applications.
- Created test scenarios from analysis documents, managed them in TFS, and maintained test data sets.
- Conducted web service testing with SOAP UI.

SELECTED PROJECTS

Vento: Riding Conditions — Production Mobile App · Website · iOS · Android · GitHub

Built and shipped a production mobile application from idea to App Store and Google Play; v1.0.3 is live on both stores. React Native, Expo and TypeScript with third-party APIs, RevenueCat, location and notifications. The product evaluates wind, precipitation, temperature, visibility, ice and route conditions to assess riding risk for motorcyclists. Covered product definition, development, QA, release management and store submission.

LLM-as-a-Judge — AI Chatbot Test Framework · GitHub

Open-source version of the production testing approach with safe mock datasets and no company code/data. Python, Playwright, Pytest, JSON-driven test data, provider-agnostic OpenAI/Gemini judge layer and Allure reporting.

AI-Assisted Playwright QA Framework · GitHub

TypeScript + Playwright E2E framework with Page Object Model, custom fixtures, feature-based suites, cross-browser execution, GitHub Actions CI and a live HTML report published to GitHub Pages on every push.

TECHNICAL WRITING

Write practical QA and software testing articles in Turkish and English, covering tester mindset, test design, bug reporting, smoke/sanity/regression, exploratory testing, Selenium and Playwright. Medium articles are also shared on LinkedIn.

CERTIFICATIONS & EDUCATION

CS50x: Introduction to Computer Science — Harvard University (edX), 2025

LinkedIn Learning, 2025: Test Management · Test Automation Foundations · Behavior-Driven Development (BDD) · APIs and Web Services

Kocaeli University — Bachelor's Degree in Electronics Teaching, 2016
