PROFESSIONAL SUMMARY

Senior Software QA Engineer with 7+ years of experience across banking, e-commerce, and mobile app projects, covering both manual and automated testing end to end. Current focus: integrating AI into testing workflows. I initiated test automation at my current company and built from scratch an LLM-as-a-Judge system that tests a production AI chatbot with 400+ scenarios.

TECHNICAL SKILLS

- Test Automation: Selenium, Appium, Playwright, Gauge, Cucumber, TestNG, Testinium
- Mobile Testing: iOS/Android, real devices, BrowserStack
- API Testing: Postman, REST API, SOAP UI, Swagger/OpenAPI
- AI-Assisted Testing: LLM-as-a-Judge, OpenAI/Gemini APIs
- Programming: Java, Python, TypeScript
- Tools & CI/CD: Azure DevOps, Jira, TFS, Git, GitHub Actions
- Other: Manual Testing, UAT, Regression Testing, SQL, Agile/Scrum

EXPERIENCE

Senior Software QA Engineer — Monster Notebook, İstanbul | September 2021 – Present

Lead testing activities for the e-commerce platform (4 country sites and iOS/Android apps).

- Established the company's first web test automation with TestProject; after the transition to Testinium infrastructure, developed all site automation scenarios with Java, Selenium, and Gauge.
- Built the test automation for the company's AI chatbot agent from scratch with Python and Playwright: automated querying over 400+ Q&A pairs, LLM-as-a-Judge evaluation delivering pass/fail verdicts with reasoning, Allure reporting with screenshots, Excel export.
- Design test plans, test cases, and end-to-end scenarios based on user stories.
- Run REST API testing with Postman across the platform's web services.
- Manage functional, regression, and E2E testing of the mobile apps on real devices and BrowserStack.
- Oversee defect tracking and documentation in Azure DevOps; collaborate within Agile/Scrum delivery cycles.

Software QA Engineer — Doğuş Technology (via Quality Museum), İstanbul | May 2021 – September 2021 (short-term project contract)

Led a team of 4 QA engineers on Doğuş Group's Zubizu mobile app (iOS/Android) in a QA Team Lead role.

- Created the project's master test plan and structured the testing processes.
- Built the standard test case template used across the team; set up scenario and task tracking in Azure DevOps.
- Managed the handover of regression scenarios to the automation team.
- Ran one-on-ones and workload planning with team members.

Software QA Engineer — Akbank (via Netaş), Istanbul | September 2018 – April 2021

Worked on Akbank's mobile banking projects (Akbank Mobile and Axess iOS/Android apps).

- Performed UI and E2E integration testing of the mobile applications.
- Wrote test scenarios based on analysis documents and managed them in TFS.
- Conducted web service testing with SOAP UI.
- Ran regression and user acceptance testing (UAT); created and maintained test data sets.

SELECTED QA PROJECTS

LLM-as-a-Judge — AI Chatbot Test Framework github.com/TuranAymis/llm-judge-chatbot-testing

Open-source version of the approach I built to test a production AI chatbot with 400+ scenarios; contains no company code or data and ships with safe mock datasets. JSON-driven testing, Playwright + Pytest, provider-agnostic judge layer (OpenAI/Gemini), Allure reporting.

AI-Assisted Playwright QA Framework github.com/TuranAymis/ai-assisted-playwright-qa-framework

Playwright + TypeScript E2E framework: POM architecture, GitHub Actions CI, live HTML test report published to GitHub Pages on every push.

VentoRideSafety github.com/TuranAymis/VentoRideSafety — Riding-risk app for motorcyclists (React Native + Expo); preparing for store release.

CERTIFICATIONS

- CS50x: Introduction to Computer Science — Harvard University (edX), 2025
- Test Management; Test Automation Foundations; Behavior-Driven Development (BDD); APIs and Web Services — LinkedIn Learning, 2025

EDUCATION

Kocaeli University — Bachelor's Degree in Electronics Teaching, 2016

LANGUAGES

Turkish (native), English (B1)
